PRODUCT OVERVIEW

Storypointing is a web and mobile based sprint story estimation tool for agile teams. It is a free tool to encourage agile teams across world to leave legacy approaches for story estimation and become more collaborative during their estimation sessions to provide more better estimations for the sprint user stories.

BUSINESS CHALLENGE

- Client interaction with system in secured and trusted way.
- Due to connection state and continuity user were facing the issue of disconnection .

STORY POINTING

SOLUTION

- We used socket io function to prevent security and authentication of user .
- We implemented Namespace in the socket to remove connection state and continuity issue.

BENEFITS

- story pointing provided accurate estimates of programming task completion time, although estimates by any individual developer who entered a task into the task tracker
- story pointing was considered by the study participants to be effective at facilitating team coordination and discussion of implementation strategies.
